Safety Information

For all Josco polishing products in this catalogue, please pay close attention to all safety information and cautions featured on the product and packaging. On most Josco packages you will find a combination of the below safety icons that will give you an indication of what safety precautions you should be taking.

If you have any questions about individual products, please contact the Josco customer service team at customerservice@josco.com.au or call 1800 444 445.

Selecting the correct Josco Compound & Buff

| Compound | Buff | Finish |
|------------|-------------------|--|
| SS | Loose Leaf Calico | High quality finish on aluminium alloys. |
| SSX | Loose Leaf Calico | High gloss finish on copper, brass and stainless steel. |
| Multishine | Loose Leaf Calico | High gloss finish on plastics and die-cast articles. |
| Tripoli | Stitched Rag | General purpose compound for copper, brass, aluminium and most metals. |
| Fastcut | Sisal | To cut back light stretch marks on copper, brass and stainless steel prior to polishing. |

Techniques for using Josco Compounds & Buffs

Step 1

Always use safety goggles or eye protection.

Step 2

All buffs have tapered centre bores and may be mounted on the left or right side of your grinder using a Josco tapered spindle.

Step 3

Select the correct buff for your job - refer to the above chart for details.

Step 4

Never use different compounds on one buff - keep a separate buff for each compound.

Step 5

Dress the buff with compound across the face of the rotating wheel for a few seconds, taking care not to apply too much compound which will overload the buff. It is far better to apply a small amount of compound more frequently than to over dress the buff.

Step 6

After dressing the buff, bring the work piece into contact with light pressure, moving back and forth across the work piece.

Step 7

After polishing, remove any residue with mineral turpentine or methylated spirits. Warm soapy water will also work.

Compounds

Polishing Compounds

Josco Polishing Compounds are used on surfaces without major blemishes, resulting in little metal removal and a bright result. Small scratches produced by cutters can easily be removed by subsequent use of a finishing compound. Polishing Compounds are used with either a stitched rag or loose leaf calico buff.

Polishing Buffs

Sisal Buffs

Josco Sisal Buffs are manufactured from alternate layers of heavy calico and sisal cloth tightly stitched together to the desired thickness. They are suitable for the preparation of polishing surfaces with excellent cutting power when used together with a Fastcut compound, and a tapered spindle when fitting onto a bench grinder.

Polishing Discs

Felt Polishing Disc

New from Josco, the felt polishing flap disc is an excellent quick-change polishing tool, made from a soft felt for use with Josco polishing compounds. It is to be used with a variable speed angle grinder or sander/polisher. For optimum performance, Josco has thoroughly tested the product in various applications to find the best results were achieved at a maximum RPM of 4,500.

Tapered Spindles

Tapered Spindle Fitting Instructions for Bench Grinders

Please take note of maximum RPM's on the product and packaging, and adhere to all safety precautions as specified in the technical information section of this catalogue.

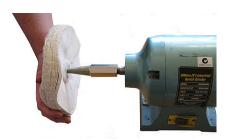

Step 1

Remove outer guard, grinding wheel and inner guard from the side of the machine that the tapered spindle is to be fitted to.

Step 2

Screw on the tapered spindle. Note: the internal thread of the spindle is counter bored to allow the spindle to cover the entire grinder shaft length.

Step 3

Carefully screw the buff onto the tapered spindle with the thickest flange facing inwards. Screw on as far as the buff will reasonably fit.

Step 4

Turn on bench grinder and the buff will tighten further against the tapered spindle.

Tapered Spindle Fitting Instructions for Sander/Polishers

Step '

Carefully screw the buff onto the tapered spindle with the thickest flange facing inwards. Screw on as far as the buff will reasonably fit.

Step 2

Turn on your sander/polisher and the buff will tighten further against the tapered spindle.
